

# Conservation and The Environment

A conservationist is a person who supports or acts for the protection and preservation of the environment and wildlife.

Conservationists believe the environment is something we have to conserve and take care of it, so that others can use it in the future.

Have you ever wondered what people do to protect and preserve the environment and wildlife? Do you wonder about the range of jobs and careers in conservation?

If you have read about or seen conservationists in books or on television, how much do you know about what they do and how successful their efforts are?

## Are you curious enough to take on our challenge?

Choose a conservationist you are curious about and want to find out more about.

1.

### Research

Research your chosen person and share your findings.

2.

### Information

Think about where you may find the information you need. What exciting facts might you discover?

3.

### Sharing findings

Decide how to share your findings.

- |                                       |                                 |
|---------------------------------------|---------------------------------|
| <input type="checkbox"/> Presentation | <input type="checkbox"/> Poster |
| <input type="checkbox"/> Report       | <input type="checkbox"/> Other  |

*Include why you chose this person and what you were curious about.*

## Did you know?

Bees are found everywhere in the world apart from Antarctica?

## Here are a few examples of people you could research.

Choose someone else if you prefer.

- **Gerald Durrell**  
Conservationist and zookeeper
- **Chris Packham CBE**  
Naturalist, nature photographer, television presenter and author.
- **Li Quan**  
Tiger and wildlife conservationist
- **Dr Jane Goodall**  
Conservation of chimpanzee habitats
